READ ME

How to read this report

- All data is from 5 Oct 2026 (WIB) unless a line gives a different date.
- Keyword data comes from RankMySEO first. RankMySEO is my own SEO tool. Each number shows its source and pull date.
- A number from a second tool has the label "third-party keyword tool".
- "KD" is RankMySEO difficulty. "SD" is third-party keyword tool difficulty. Both use a scale of 0 to 100.
- The label "estimate" marks a projection.
- The label **[DATA FROM LUCA]** marks data that I need from you.
- "ID" marks a SERP check from an Indonesian location. "non-ID" marks a SERP check from outside Indonesia.
- References such as [E7] point to the Sources list at the end of this report.

1. Summary

1.1 Main answer and first 3 actions

This report gives you my SEO strategy for 1001startup.id. It covers keywords, on-page fixes, a topical map, pillar pages, a safe link plan and a 30/60/90-day plan.

The main answer: AI engines already read your site, but Google sends few clicks and the site has 0 backlinks (RankMySEO, 5 Oct 2026) [E2]. Start with the 3 actions below. Then add quality gates to the thin pages (section 3.4). Then build editorial links and digital PR from the census data. Do not use a classic PBN.

Do these 3 actions first (from the days 1 to 30 rows of the plan in section 7):

1. Give Search Console access for 1001startup.id (steps in Next steps).
2. Change titles, H1s and intros on `/id/` URLs. Start with home, /id/unicorn and /id/closed.
3. Make /tentang. Then set rel "nofollow" on the template links to jatevo.ai and vantis.sh.

1.2 Where the site is today

- 1001startup.id is a bilingual census. English pages use bare paths. Bahasa Indonesia pages use `/id/`.
- The sitemap has 2,510 URLs, with 1,255 per language [E20].
- The census shows 387 companies and US$18.3 billion disclosed funding (208 of 387 rows) (https://1001startup.id/id/, 5 Oct 2026, 11:13 WIB) [E13].
- It also shows US$20.6 billion combined valuation, from the 20 of 387 rows that have a recorded valuation [E13].
- It also shows 154,980 jobs (estimate) and IDR 84.7 T output per year (estimate) [E13].
- RankMySEO, project "1001 startup Luca" (Indonesia, language id), gives these values (RankMySEO, 5 Oct 2026) [E2]:

Metric	Value
Organic traffic	40
Organic keywords	63
Backlinks	0
Domain authority	1
On-page score	94.2

- 1001startup.id is outside the top 20 for "startup indonesia" and "perusahaan startup indonesia" (RankMySEO, rank check 5 Oct 2026, 10:52 WIB) [E3] [E4].
- Your AI-traffic screenshot shows 47,242 page reads since 29 Aug 2026 [E19]. The split is in the table below.

Reader type	Page reads	Share
People	11,517	24%
AI answers	1,103	2%

Reader type	Page reads	Share
AI search and training	21,916	46%
Search engines	12,706	27%

- The same screenshot shows "ChatGPT answers someone (verified) 1,084" and "Claude 99" [E19].
- Pages that AI assistants opened most include, for example, `/` (618), `/company/astro` (18), `/company/traveloka` (14), `/company/nanovest` (12), `/company/ruangguru` (11) and `/investor/gdp-venture` (11) [E19].

1.3 The main gap

AI engines already read the site. Google search sends few clicks. The site has 0 backlinks in RankMySEO [E2].

1.4 What I recommend

1. Move Indonesian keyword targets to the `/id/` tree.
2. Add data-led pillar pages that use the census data first.
3. Add quality gates on thin programmatic pages.
4. Build links from your own companies (vantis.sh, jatevo.ai, oyenza.com) with editorial, in-body links.
5. Build links with digital PR from the census data.
6. Do not use a classic PBN. Section 6.1 gives the reasons, with Google sources.

1.5 Top 10 keywords to start with

I selected these keywords from volume, difficulty and data fit. This is my judgment.

#	Keyword	Volume	KD / SD
1	venture capital indonesia	4,400	KD 32
2	startup indonesia	590	KD 38
3	unicorn indonesia	320	KD 33
4	perusahaan startup indonesia	140	KD 13
5	startup unicorn indonesia	140	KD 19
6	modal ventura	1,600	SD 15
7	pendiri gojek (needs a founder field)	3,600	SD 25
8	gdp venture	880	SD 40
9	startup di indonesia	210	SD 23
10	pendanaan startup	70	KD 19

KD values come from the RankMySEO keyword planner [E5]. SD values come from the third-party keyword tool [E7]. Volume is monthly searches in Indonesia, pulled on 5 Oct 2026.

2. Keyword research

2.1 Sources and method

I used these sources, all in read-only mode:

1. RankMySEO (https://rankmyseo.com). Country id, language id. Reports: project overview, tracked keywords, competitors and keyword planner (5 seeds). Also rank comparison, Search Console and Analytics data, and site audit [E1] to [E6].
2. A third-party keyword tool. Location Indonesia (location ID 2360), language id. I used it only where RankMySEO had no row [E7] [E8] [E9].
3. Google autocomplete, hl=id, gl=id [E10].
4. Google Trends, geo ID, last 12 months [E11].
5. SERP checks (section 2.6).

I did not run some RankMySEO reports:

- Site research: this report can start Auto-add, and Auto-add changes the project. I did not run it.
- Keyword gap and competitor traffic: the project has 0 saved competitors, so these reports have no input. I did not add competitors, because that is a project change.
- Search Console and Analytics data: the project has no connected property yet. These reports returned no data. See Next steps.

Intent labels: "(tool)" is the intent from the tool. "(judged)" is my reading of the SERP and autocomplete.

2.2 Seed list

startup indonesia; daftar startup indonesia; perusahaan startup indonesia; unicorn indonesia; decacorn indonesia; venture capital indonesia; modal ventura; investor startup indonesia; pendanaan startup; valuasi [company]; pendiri [company]; startup [sector] indonesia; startup [kota]; startup bangkrut; jumlah startup di indonesia; data startup indonesia; berita startup indonesia; [investor] portofolio.

2.3 Priority list (44 keywords)

Rule: Indonesian keywords target the `/id/` URL. The English URL stays as the hreflang alternate.

The full list of 44 keywords, in 5 groups, is in Appendix A. Section 1.5 gives the top 10 to start with.

> **NOTE** **City note**
>
> - "startup yogyakarta" (140, SD 21), "startup surabaya" (40) and "startup malang" (40) have demand [E7].
> - The census covers only Greater Jakarta (364), Bandung (17) and Bali (6) (https://1001startup.id/id/) [E13].
> - Do not make city pages for cities with no census rows. Add them when the census has rows there **[DATA FROM LUCA]**.

2.4 Notes on demand

- A volume of 0 or 10 is a tool floor. It does not prove zero demand.
- Autocomplete shows demand for "investor startup indonesia". It is the first suggestion for "investor startup" [E10].
- Autocomplete also shows "daftar startup indonesia" as the first suggestion for "daftar startup" [E10].
- News changes some volumes. Example: "pendiri gojek" shows 9,900 in 2025-09 and 14,800 in 2026-05, then 3,600 in 2026-08 (third-party keyword tool, monthly series) [E21].

Google autocomplete (hl=id, gl=id) adds year and status variants [E10]:

startup indonesia 2026; startup indonesia yang bangkrut; startup indonesia yang sudah ipo; daftar startup unicorn indonesia; daftar startup di jogja; jumlah startup di indonesia 2026; data jumlah startup di indonesia; pendanaan startup 2026; valuasi gojek 2026; berapa valuasi traveloka; list venture capital indonesia; portofolio east ventures; startup tutup di indonesia.

Google Trends (geo ID, 12 months, pulled 5 Oct 2026) gives relative values only, not volumes. Its top related query for "startup indonesia" is "perusahaan startup indonesia" [E11].

2.5 Where the site shows up today

- The third-party keyword tool shows 63 keywords for 1001startup.id in Indonesia (domain overview, 5 Oct 2026) [E9].
- The sample rows that the tool returned are all on company, investor or chain pages. The examples below come from that sample.

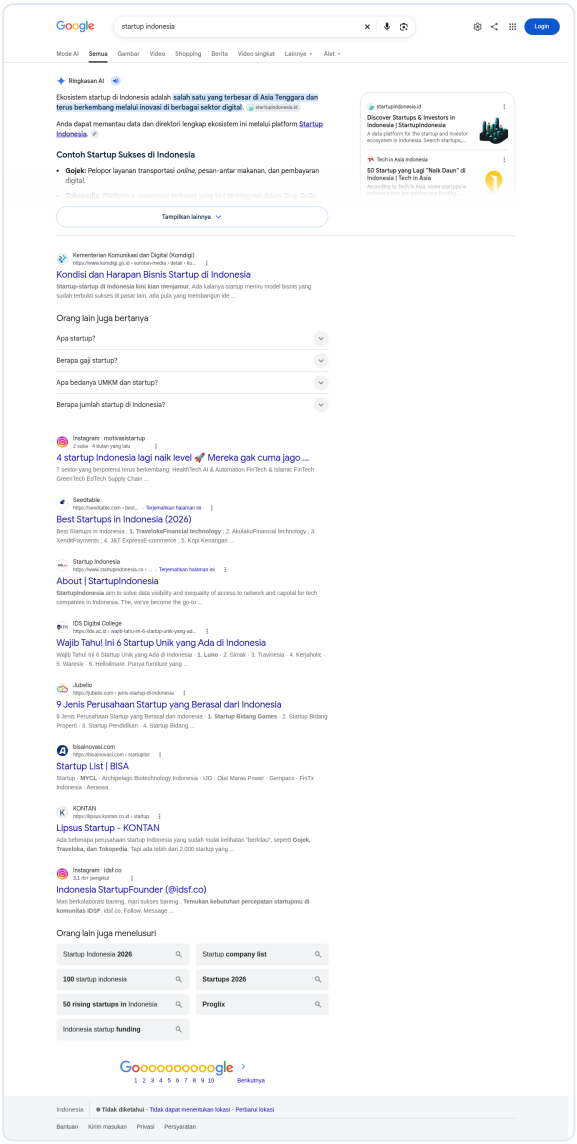

Keyword	Position	URL
bababos	13	/id/company/bababos
botani seed	15	/company/botani-seed-indonesia
gdp venture	20	/investor/gdp-venture (English URL)
500 global	28	/id/investor/500-global
alpha jwc	52	/id/investor/alpha-jwc-ventures

- The same tool shows organic search traffic at 0 for each month from 2025-10 to 2026-08, and 40 in 2026-09 [E9].
- The programmatic pages are the entry point today. Protect them with the quality gates in section 3.4.

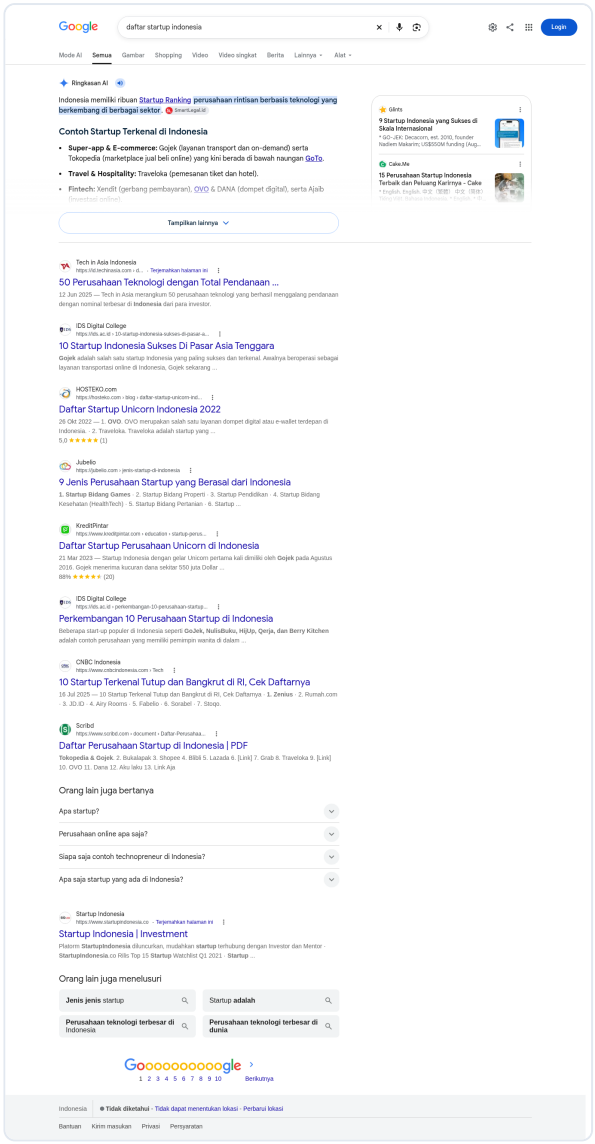

2.6 SERP checks (who ranks)

Check	Location	Source and date	Finding
RankMySEO rank check	ID	RankMySEO, rank check 5 Oct 2026, 10:52 WIB [E3] [E4]	1001startup.id is outside the top 20 for "startup indonesia" and "perusahaan startup indonesia". The project has no competitor rows, so the check gives no SERP list.

Check	Location	Source and date	Finding
SERP check "startup indonesia"	ID (location 2360)	third-party keyword tool, SERP date 8 Sep 2026 [E8]	AI Overview at position 1. startupindonesia.co (2), Instagram startupindonesia_co (4), glints.com (5), 1000startupdigital.id (6), startupindonesia.id (7), LinkedIn (8).
SERP check "venture capital indonesia"	ID (location 2360)	third-party keyword tool, SERP date 5 Oct 2026 [E8]	AI Overview. xendit.co list "15 Venture Capital Paling Aktif di Indonesia" (2), east.vc (3), Instagram amvesindo.id (4), angoventures.id (6), bayarind.id list (7), mandiri-capital.co.id (8).
SERP check "perusahaan startup indonesia"	ID (location 2360)	third-party keyword tool, SERP date 4 Oct 2026 [E8]	AI Overview. "100 Perusahaan Startup Terbaik · September 2026" (2, domain hidden behind a Google redirect), ids.ac.id (5), mediaindonesia.com (6), jakartainvest.com (11).
SERP check "unicorn indonesia"	ID (location 2360)	third-party keyword tool, SERP date 5 Oct 2026 [E8]	AI Overview and image pack. List articles, databoks.katadata.co.id (9), tekno.kompas.com (10), komdigi.go.id (11).
Google capture "startup indonesia" and "daftar startup indonesia"	non-ID (capture from outside Indonesia; Google footer "Indonesia · Tidak diketahui")	Site research dossier, 5 Oct 2026, about 11:12 WIB [E20]	AI Overview cites startupindonesia.id ("startup indonesia") and SmartLegal.id ("daftar startup indonesia"). id.techinasia.com is #1 for "daftar startup indonesia". 1001startup.id is absent from both.
Web search, 3 queries	non-ID	Web search, 5 Oct 2026, about 11:17 WIB [E12]	Results show directories and list sites, for example startup.id, startupblink.com and startupindonesia.id ("daftar startup indonesia 2026"), and founderplus.id and openvc.app ("investor startup indonesia daftar venture capital"). "1001startup.id": 1001startup.id (1), 1000startupdigital.id (2).

SERP check (non-ID): startup indonesia, 5 Oct 2026

SERP check (non-ID): daftar startup indonesia, 5 Oct 2026

What the SERPs show:

- AI Overviews appear on all four ID SERPs. Citable, answer-first blocks are important (section 2.7).
- Page 1 holds list articles and two "Startup Indonesia" data platforms.
- No page 1 result in the SERPs that I checked shows a sourced figure per company. The census does. This is the content advantage of 1001startup.id.

WATCH **Brand risk: 1000 Startup Digital**

- "1000 Startup Digital" (1000startupdigital.id) is a government program.
- It ranks for "startup indonesia" (ID, third-party keyword tool) [E8].
- It is #2 for the brand query "1001startup.id", after 1001startup.id (1) (web search, non-ID, 5 Oct 2026) [E12].
- Use the full brand "1001startup.id" plus "sensus startup Indonesia" in titles and PR.

2.7 AI answer engines (GEO and AEO)

Facts:

- ChatGPT used the pages to answer 1,084 times, and Claude 99 times (your screenshot) [E19].
- The site already has strong GEO parts. Each company page has an answer sentence, a "Kutip sebagai" line, dateModified in schema, and /llms.txt is live [E13].
- Example answer sentence: "Menurut sensus 1001startup.id (diperbarui 1 Okt 2026), Astro tercatat 994 pekerja (dibaca 2026-08-29); pendanaan yang diumumkan US$142 juta; kantor pusatnya di Jakarta Barat." (https://1001startup.id/id/company/astro) [E13].
- Google says that its AI features need no new machine-readable files, AI text files or markup [E17].
- Source: https://developers.google.com/search/docs/appearance/ai-features, last updated 2025-12-10 UTC.
- Google also says there is "no special schema.org structured data that you need to add" (same page) [E17].
- So llms.txt is optional. Keep it, because it states the citation rules. Do not expect Google rankings from it.

How the pages earn citations:

1. Put an answer-first block at the top of each hub (home, /investors, /unicorn, /closed, sector, city, research).
2. In that block, use one sentence with the number, the date and the source. Copy the pattern from the company template.
3. Keep the Dataset schema on home.
4. Add license, temporalCoverage, variableMeasured, distribution and dateModified to the Dataset schema.
5. Show clear entity facts, one fact per line: legal name, sector, head office, founded year, founders, last round and investors.
6. Make the schema match the visible text.
7. Show "diperbarui [date]" on each hub, and use the same date in schema dateModified.
8. Keep the census count in llms.txt current.

Note on step 4: Google lists the first four of these properties as Dataset recommended properties (https://developers.google.com/search/docs/appearance/structured-data/dataset, last updated 2026-09-08 UTC) [E17]. The company template already has an answer sentence.

Prompts to track (proposed only; I did not create them). I built them from the autocomplete and People also ask data:

1. "Berapa jumlah startup di Indonesia tahun 2026?"
2. "Apa saja startup unicorn di Indonesia?"
3. "Daftar venture capital paling aktif di Indonesia"
4. "Berapa valuasi Gojek sekarang?"
5. "Siapa pendiri Traveloka?"
6. "Startup Indonesia apa saja yang bangkrut atau tutup?"
7. "Berapa total pendanaan startup Indonesia?"
8. "Startup fintech terbesar di Indonesia"
9. "Startup apa saja yang didanai East Ventures?"
10. "Which Indonesian startups raised the most funding?"

Tracking:

- Use RankMySEO AI-answer tracking (https://rankmyseo.com). The account plan includes it, with 10 prompts per site [E1].
- It checks ChatGPT and Gemini mentions, rank, rivals and cited pages.
- I did not add prompts yet. I will confirm the 10 prompts before I add them.
- Keep your own AI-traffic counter (/stats) as the second signal.

3. On-page fixes

3.1 What I checked

- I fetched the main page types with curl and a desktop Chrome user agent on 5 Oct 2026, 11:13 to 11:25 WIB [E13].
- All sampled pages returned HTTP 200, except /about. /about returns 404 with robots "noindex, nofollow" [E13].
- robots.txt allows all crawlers and has a sitemap line [E13].
- The sitemap has 2,510 URLs, hreflang en/id/x-default, and lastmod 2026-09-30 [E13].

Good things to keep (seen on 5 Oct 2026):

- Self canonicals, reciprocal hreflang (en, id, x-default = English), html lang en/id, robots "index, follow" and server-rendered HTML [E13].
- http to https and www to apex both return 301 [E13] [E20].
- Company pages have an answer sentence, a "Kutip sebagai" line, a confidence score and a source link on each figure [E13].
- Example confidence score: "Seberapa baik kami mengetahuinya: 0.85 · tinggi" on /id/company/astro [E13].
- RankMySEO site audit: score 94.2, with one issue (short title, 2 pages) [E6].
- That audit crawled 4 pages only. Run a full RankMySEO site audit after the fixes below.

Priority values in the tables below and in Appendix B are my judgment. High means "do first". Medium means "do after the High items". Low means "do after the Medium items".

3.2 Site-wide fixes

#	Page	Issue	Fix	Priority
1	`/id/` tree	Indonesian keywords do not target the `/id/` URLs.	Write titles, H1s and intros on `/id/` URLs in the words people search (Appendix A). Keep x-default on English.	High
2	/about	/about returns 404. There is no about page.	Make /tentang (and /about). Show who builds the census (Luca Cada Lora), the "a product by" line, the method and the contact. The brand line is Jatevo Labs or Vantis. You choose **[DATA FROM LUCA]**. This page is the brand tie for the link plan (section 6).	High
3	Main nav and home	The nav "Sectors" link goes to /coverage#sectors. The home page has 0 links to /sector/ and /investor/ pages. /unicorn is not in the nav [E20]. /id/sector returned 302 on 5 Oct 2026.	Add a /id/sector hub page. Link the sector, city, investor and unicorn hubs from home and nav.	High
4	Home	388 of 389 images have empty alt [E20].	Add alt text to logos. Use "Logo [company]".	Medium

#	Page	Issue	Fix	Priority
5	All URLs	Trailing-slash URLs, for example /company/gojek/ [E13] [E20].	Use one trailing-slash rule: 301 the slash URL to the no-slash URL. My two checks gave different results (404 and 301), so please confirm the current behaviour.	Medium
6	sitemap.xml	One flat sitemap for all page types.	Split it into a sitemap index with one child sitemap per page type (company, investor, sector and city, research, chain). Then the Search Console Page Indexing report shows each type apart. This helps the quality gates in section 3.4.	Medium
7	Search Console	The RankMySEO project has no connected Search Console property [E6].	Give the RankMySEO project access to the 1001startup.id property, so that RankMySEO can show Search Console data. Next steps gives the steps **[DATA FROM LUCA]**.	High

3.3 Fixes per template

The fix tables for the company, investor, sector and city, research, home and other pages are in Appendix B. Each row gives the item, the issue, the fix and the priority.

3.4 Thin pages and quality gates

Why: the September 2026 spam update was rolling out on 5 Oct 2026 [E20]. Google says: "Scaled content abuse is when many pages are generated for the primary purpose of manipulating search rankings and not helping users." (https://developers.google.com/search/docs/essentials/spam-policies, fetched 5 Oct 2026) [E17]. The census is real, sourced data. But empty templates still look like scaled pages. Put a gate on them.

Company pages (recommendation):

1. Index a company page only if 4 of these 7 fields have a source:
   - disclosed funding
   - last round
   - valuation
   - headcount with read date
   - head office address
   - investors (1 or more)
   - founder or founding year
2. Below 4 fields, set "noindex, follow". Remove the URL from the sitemap.
3. Count how many of the 387 rows fail the gate **[DATA FROM LUCA]**.

Example: /company/qalboo has no funding or headcount in its meta description (fetched 5 Oct 2026) [E13]. The home page says 208 of 387 rows have disclosed funding [E13].

Investor pages (recommendation):

1. Index the page if the investor backs 2 or more census companies (148 of 507 pages) [E14].
2. Also index the page if it has its own fund data.

3. Set "noindex, follow" on 1-company investors with no fund data (up to 359 pages per language). Keep these pages for users and internal links.
4. Set "noindex" on placeholder entities, such as "undisclosed angel investor".

Other gates:

Page type	Gate
Chain pages for companies outside the census (`/chain/x/<slug>` , 172 per language)	Index only with 2 or more sourced relations.
City pages	Create only with 10 or more census companies.
Sector pages	Create only with 5 or more census companies. "bank" has 8 and "agri" has 10 [E15].
All gated pages	Remove them from the sitemap.

- The noindex here is a quality decision. Google's crawl guide says not to use noindex to save crawl budget [E20].
- After each census rebuild, check the gates with a RankMySEO site audit and the Search Console Page Indexing report.

MYTH CHECK **Myth check: does nofollow on outbound links save crawl budget? [E20]**

- In the X thread, I asked about this old tip myself: "Cuma ini mitos lama sih, belum pernah research lagi" [E19]. The check below gives the answer for your site.

Verdict: myth for 1001startup.id.

- Google counts crawl budget per hostname: "Google's crawling infrastructure defines a site as a unique hostname" (https://developers.google.com/crawling/docs/crawl-budget, last updated 2026-07-22 UTC, fetched 2026-10-05). A crawl of an external news URL uses that host's budget, not the census budget.
- The guide is for sites with "1 million+ unique pages", or "10,000+ unique pages" with daily changes. 1001startup.id has 2,510 URLs.
- nofollow, sponsored and ugc are hints. nofollow became a crawl hint on 1 Mar 2020 (Google Search Central Blog, "Evolving nofollow", 10 Sep 2019).
- For URLs on your own site, Google says to use robots.txt disallow, not nofollow (https://developers.google.com/search/docs/crawling-indexing/qualify-outbound-links).
- Action: keep nofollow or sponsored on paid or non-editorial outbound links, for link-policy reasons only. The /news page has 555 external links [E20]. Leave editorial source links followed.

4. Topical map

Rules:

- Use one main keyword per URL.
- Indonesian keywords target `/id/`.
- Status values: "exists" (live on 5 Oct 2026), "fix" (live, needs the changes in section 3), "new" (to build).

Pillar	URL	Main keyword	Secondary keywords	Status
P1 Sensus	/id/	startup indonesia	perusahaan startup indonesia, startup di indonesia, daftar startup indonesia, startup terbesar di indonesia	fix
P1 Sensus	/id/research/jumlah-startup-indonesia	jumlah startup di indonesia	data jumlah startup di indonesia, jumlah startup di indonesia 2026	new
P1 Sensus	/id/coverage	data startup indonesia	metodologi sensus startup	fix
P1 Sensus	/id/sector (hub)	startup per sektor	sektor startup indonesia	new
P1 Sensus	/id/sector/[16 sectors]	startup [sector] indonesia	daftar startup [sector]	fix
P1 Sensus	/id/company/[slug]	[company] valuasi	[company] pendanaan, pendiri [company]	fix
P2 Venture capital	/id/investors	venture capital indonesia	investor startup indonesia, perusahaan modal ventura di indonesia, list venture capital indonesia	fix
P2 Venture capital	/id/investor/[slug] (gated)	[investor] portofolio	[investor] startup	fix
P2 Venture capital	/id/research/modal-ventura-indonesia	modal ventura	cara kerja modal ventura	new
P3 Unicorn	/id/unicorn	unicorn indonesia	startup unicorn indonesia, decacorn indonesia, daftar startup unicorn indonesia	fix
P3 Unicorn	/id/research/unicorn-adalah	unicorn adalah	perusahaan unicorn indonesia yang bergerak di bidang transportasi online adalah	new
P3 Unicorn	/id/research/decacorn-adalah	decacorn adalah	decacorn indonesia (links to /id/unicorn)	new
P4 Pendanaan	/id/research/pendanaan-startup-indonesia	pendanaan startup	pendanaan startup 2025, pendanaan startup 2026, pendanaan startup di indonesia	new
P4 Pendanaan	/id/research/tahapan-pendanaan-startup	mekanisme pendanaan startup melalui venture capital	tahapan pendanaan startup, sumber pendanaan startup	new
P4 Pendanaan	/id/research/startup-indonesia-ipo	startup indonesia yang sudah ipo	IPO startup Indonesia	new

Pillar	URL	Main keyword	Secondary keywords	Status
P5 Tutup	/id/closed	startup indonesia yang bangkrut	startup bangkrut, unicorn indonesia bangkrut, startup tutup di indonesia	fix
P6 Peta	/id/map and /id/city/[jakarta, bandung, bali]	startup jakarta	startup bandung, startup bali (Bali as a section on /id/map, no indexed city page until 10+ rows)	fix
News	/id/news	berita startup indonesia	(none)	exists

Topical map: pillar pages and their cluster pages

P1 Sensus

/id/ fix
Main keyword: startup indonesia

- /id/research/jumlah-startup-indonesia new
- /id/coverage fix
- /id/sector (hub) new
- /id/sector/[16 sectors] fix
- /id/company/[slug] fix

P2 Venture capital

/id/investors fix
Main keyword: venture capital indonesia

- /id/investor/[slug] (gated) fix
- /id/research/modal-ventura-indonesia new

P3 Unicorn

/id/unicorn fix
Main keyword: unicorn indonesia

- /id/research/unicorn-adalah new
- /id/research/decacorn-adalah new

P4 Pendanaan

/id/research/pendanaan-startup-indonesia new
Main keyword: pendanaan startup

- /id/research/tahapan-pendanaan-startup new
- /id/research/startup-indonesia-ipo new

P5 Tutup

/id/closed fix
Main keyword: startup indonesia yang bangkrut

No cluster pages in the map

P6 Peta

/id/map and /id/city/[jakarta, bandung, bali] fix
Main keyword: startup jakarta

No cluster pages in the map

Hub outside the pillars: /id/news (berita startup indonesia) exists

exists live on 5 Oct 2026 fix live, needs changes new to build

Figure 1. The topical map in the table above, as pillar-to-cluster boxes. Indonesian keywords target **/id/** .

Rules against cannibalization:

- "startup indonesia" and "perusahaan startup indonesia" go to one URL (/id/). This is my judgment from the Trends data: Trends lists "perusahaan startup indonesia" as the top related query of "startup indonesia" [E11].
- "unicorn indonesia" (list) goes to /id/unicorn. "unicorn adalah" (definition) goes to a research page. The definition page links to the list with the anchor "daftar startup unicorn Indonesia".
- "venture capital indonesia" (list) goes to /id/investors. "modal ventura" (explainer) goes to a research page.

- English pages keep their English keywords. hreflang connects the pairs. Do not write a second Indonesian page on the same topic.

5. Pillar content plan

Each pillar uses census data first. Each figure shows its source and date, as the company pages do now. The H2 and H3 lines below are proposed headings in Bahasa Indonesia.

P1. Sensus startup Indonesia (/id/)

Main keyword: startup indonesia (590, KD 38, RankMySEO, 5 Oct 2026) [E5].

- H2: Berapa jumlah startup di Indonesia menurut sensus ini? (387 companies, 1 Okt 2026)
- H2: Daftar perusahaan startup Indonesia (filter table: sector, city, funding)
  - H3: Startup terbesar menurut pendanaan
  - H3: Startup terbesar menurut jumlah pekerja
- H2: Startup Indonesia per sektor (16 sectors with counts, link each)
- H2: Startup Indonesia per kota (Jakarta Raya 364, Bandung 17, Bali 6)
- H2: Total pendanaan dan valuasi (US$18.3 miliar disclosed on 208 of 387 rows; US$20.6 miliar combined valuation from 20 of 387 rows with a recorded valuation) [E13]
- H2: Cara kami menghitung (link to /id/coverage and /tentang)

P2. Venture capital Indonesia (/id/investors)

Main keyword: venture capital indonesia (4,400, KD 32, RankMySEO, 5 Oct 2026) [E5].

- H2: Berapa banyak investor yang mendanai startup Indonesia? (507 funds, firms and angels on 308 of 387 companies) [E14]
- H2: Venture capital paling aktif di Indonesia (East Ventures 49, GDP Venture 25, Init-6 24; source https://1001startup.id/investors, 5 Oct 2026) [E14]
- H2: Investor menurut sektor
  - H3: Investor fintech
  - H3: Investor AI dan cloud
- H2: Investor asing dan lokal **[DATA FROM LUCA: investor country field]**
- H2: Apa itu modal ventura? (short block, link to the explainer)

P3. Startup unicorn Indonesia (/id/unicorn)

Main keyword: unicorn indonesia (320, KD 33, RankMySEO, 5 Oct 2026) [E5].

- H2: Ada berapa startup unicorn di Indonesia? (10 companies valued at US$1 billion or more in the census) [E13]
  - Caveat to keep in the answer: only 24 of 387 census rows carry a sourced valuation. The page says "ini bukan daftar lengkap unicorn Indonesia" (https://1001startup.id/id/unicorn, 5 Oct 2026) [E13].
- H2: Daftar unicorn dan decacorn Indonesia (table: name, valuation, basis, date)
  - H3: Valuasi dari putaran pendanaan (7)
  - H3: Kapitalisasi pasar (2)
  - H3: Estimasi (1)

- H2: Unicorn yang sudah IPO (link to the IPO research page)
- H2: Unicorn adalah ... (2 sentences, link to /id/research/unicorn-adalah)

P4. Pendanaan startup Indonesia (new: /id/research/pendanaan-startup-indonesia)

Main keyword: pendanaan startup (70, KD 19, RankMySEO, 5 Oct 2026) [E5]. Secondary keyword: mekanisme pendanaan startup melalui venture capital (110, KD 6, RankMySEO, 5 Oct 2026) [E5].

- H2: Total pendanaan startup Indonesia (US$18.3 miliar disclosed on 208 of 387 rows) [E13]
- H2: Pendanaan per tahun **[DATA FROM LUCA: funding by year]**
- H2: Pendanaan per sektor **[DATA FROM LUCA: funding by sector]**
- H2: Pendanaan per tahap (seed, Series A, B, C+) **[DATA FROM LUCA: round field]**
- H2: Siapa yang paling banyak mendanai? (link to P2)
- H2: Download data (only if you offer a CSV **[DATA FROM LUCA]**)

P5. Startup Indonesia yang bangkrut dan tutup (/id/closed)

Main keyword: startup indonesia yang bangkrut (20, SD 5, third-party keyword tool, 5 Oct 2026) [E7].

- H2: Berapa startup Indonesia yang tutup? (3 companies, US$428 juta raised, 2023 to 2025) [E13]
- H2: Daftar startup yang tutup (name, sector, funding, year, source)
- H2: Data yang dihapus dari sensus (4 rows, with the reason)
- H2: Pola: sektor dan tahap pendanaan

WATCH **Open item: eFishery**

- "efishery" has 9,900 searches per month (third-party keyword tool, 5 Oct 2026) [E7].
- eFishery appears on /closed. /company/efishery returned 404 on 5 Oct 2026 [E13].
- Option 1: give closed companies a profile page with the status "tutup".
- Option 2: add an anchor on /id/closed (#efishery) with a full entry.
- You decide **[DATA FROM LUCA]**.

P6 (optional). Peta startup Indonesia (/id/map and city pages)

Main keyword: startup jakarta (50, SD 20, third-party keyword tool, 5 Oct 2026) [E7].

- H2: Di mana kantor startup Indonesia? (Jakarta Raya 364 of 387) [E13]
- H2: Startup Jakarta per wilayah (Jakarta Barat, Selatan, Pusat ...) **[DATA FROM LUCA: district counts]**
- H2: Startup Bandung dan Bali (target keyword: startup bali, 30, SD 20, third-party keyword tool [E7])
- Set /id/city/bali to noindex until it has 10 or more census companies. It has 6 [E13]. /id/city/bandung (17) and /id/city/jakarta (364) stay indexed.
- Add a text list of cities with counts, so that search engines can read the map.

6. Safe link plan

6.1 Why not a classic PBN or a mass AI blog

Google's spam policies do not use the words "PBN" or "private blog network" [E20]. But they cover the PBN methods.

POLICY **Why not a classic PBN or a mass AI blog**

- Google: "Link spam is the practice of creating links to or from a site primarily for the purpose of manipulating search rankings." (spam policies, https://developers.google.com/search/docs/essentials/spam-policies, last updated 2026-08-28 UTC) [E17].
- Google lists "Buying or selling links for ranking purposes" as link spam (same page).
- Google: "Expired domain abuse is where an expired domain name is purchased and repurposed primarily to manipulate search rankings by hosting content that provides little to no value to users." (same page).
- Google: "Scaled content abuse is when many pages are generated for the primary purpose of manipulating search rankings and not helping users." (same page).
- Google lists "Creating multiple sites with the intent of hiding the scaled nature of the content" as scaled content abuse (same page).
- Google also lists "Using generative AI tools or other similar tools to generate many pages without adding value for users" (same page).
- So, many AI posts in one day can be scaled content abuse. The definition names the purpose of the pages, not a page type. News pages and research pages are not outside it.
- Google's spam-updates guide says: "In the case of a link spam update (an update that specifically deals with link spam), making changes might not generate an improvement. ... Any potential ranking benefits generated by those links cannot be regained." (https://developers.google.com/search/docs/appearance/spam-updates, last updated 2025-12-10 UTC) [E20].

My plan uses real related sites with clear brand ties and editorial links. It uses nofollow or sponsored where links are not editorial. It adds digital PR from the census data.

6.2 Start point (5 Oct 2026)

- RankMySEO shows 0 backlinks and domain authority 1 (RankMySEO, 5 Oct 2026) [E2].
- On the pages checked (the homepages of vantis.sh, jatevo.ai and oyenza.com, plus vantis.sh/team), no owned site links to 1001startup.id. A full crawl of the owned sites was not done [E20].
- Each page of 1001startup.id has a "Who is building this" block (https://1001startup.id/id/, 5 Oct 2026) [E13].
- This block has followed links to jatevo.ai and vantis.sh, with rel "noopener" only [E13].
- The anchors are "Sovereign AI with jatevo.ai" and "AI software factory with vantis.sh" [E13].
- The cookie link goes to vantis.sh/cookies [E13].
- With 2,510 URLs, this block is a sitewide template link.
- In the X thread, I wrote: "Jatevo kasih link ke 1001" [E19].

My post with this advice in the X thread also has an old tip about nofollow on news links [E19]. Section 3.4 checks that tip. It does not save crawl budget on your site.

6.3 Links from your companies to the census (contextual, editorial)

Google's link spam list includes "Excessive link exchanges" and "partner pages exclusively for the sake of cross-linking". It also includes "Widely distributed links in the footers or templates of various sites" (https://developers.google.com/search/docs/essentials/spam-policies, last updated 2026-08-28 UTC) [E17].

So:

1. Put links in the body of relevant pages.
2. Show a clear brand tie on each page.
3. Do not add a footer link in either direction.

From (owned site)	Page to use or create	Link to	Anchor (example)	Visible brand tie (proposed text on the page)
vantis.sh	Team or founder bio of Luca	https://1001startup.id/id/	"sensus startup Indonesia 1001startup.id"	"Luca Cada Lora also builds 1001startup.id, the sensus startup Indonesia."
vantis.sh	Blog post or case study on the census agent. robots.txt names "VantisSupportBot" as "the census agent's own indexer" [E20].	https://1001startup.id/coverage	"how the census is built"	"Vantis built the data pipeline for 1001startup.id."
jatevo.ai	About or founder page	https://1001startup.id/	"1001startup.id"	"Luca Cada Lora, the founder of Jatevo, also builds 1001startup.id."
jatevo.ai	Page or post on AI and cloud companies in Indonesia	https://1001startup.id/id/sector/ai-cloud (33 companies)	"startup AI dan cloud di Indonesia"	"Data from 1001startup.id, a census by the founder of Jatevo."
oyenza.com	Blog post on fintech or QRIS in Indonesia (the blog has 8 posts [E20])	https://1001startup.id/id/sector/fintech (64 companies)	"64 startup fintech di Indonesia (sensus 1001startup.id)"	"Oyenza and 1001startup.id have the same founder, Luca Cada Lora."
oyenza.com	"Dibuat oleh" or about line, if you want one	/tentang	brand name	The "Dibuat oleh" line itself. Set rel "nofollow" (see the rule table in section 6.5).

Owned-network link flow: your companies link to 1001startup.id

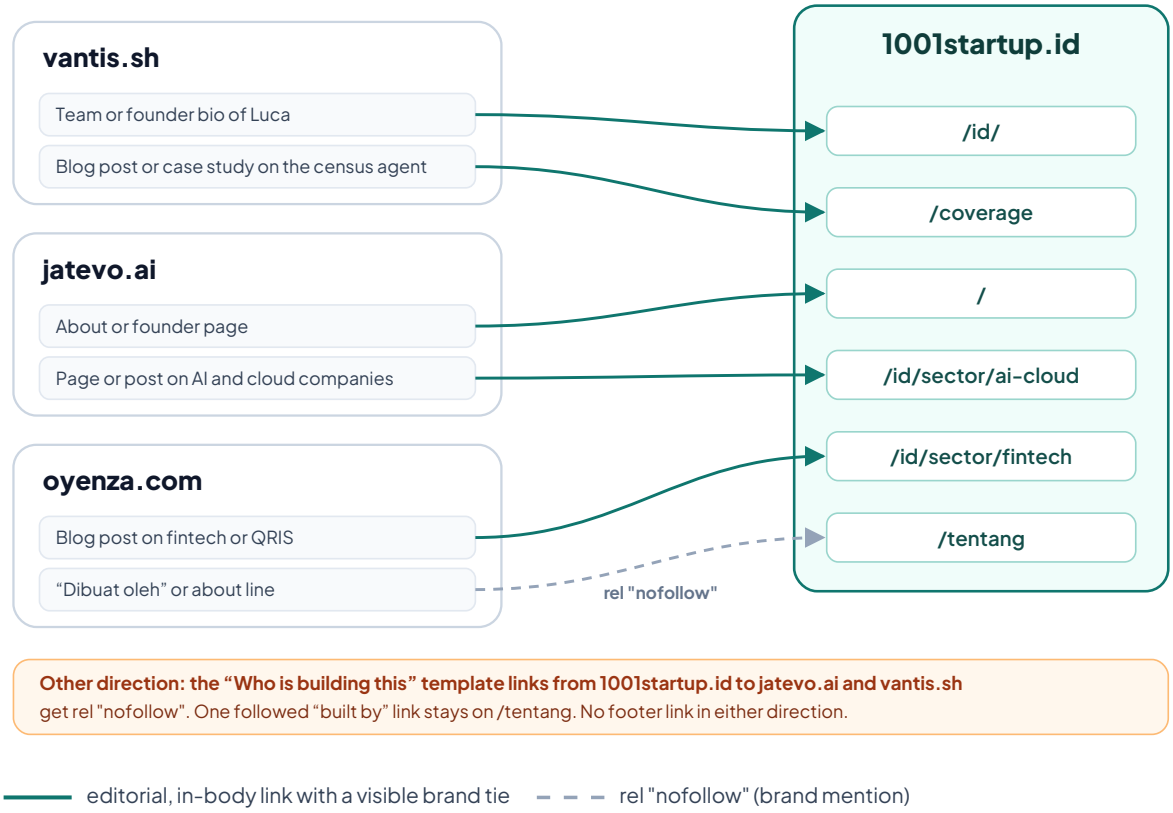

Figure 2. The links in the table above. Start with 4 to 6 links in total. Use branded or descriptive anchors.

Volume and anchors:

- Start with 4 to 6 links in total. This number is my judgment, not a Google rule.
- Use branded or descriptive anchors.
- Do not repeat an exact-match anchor such as "startup indonesia" on many pages.

6.4 Sitewide template links on 1001startup.id

1. Set rel "nofollow" on the jatevo.ai and vantis.sh links in the "Who is building this" block on all 2,510 URLs.
2. Option: remove the block from the template. Keep it only on /tentang.
3. Keep one followed "built by" link on /tentang, for example "Dibuat oleh Vantis" or "A Jatevo Labs product". This is the one exception in the rule table in section 6.5. You choose the brand **[DATA FROM LUCA]**.
4. Do not add a reverse sitewide footer link on vantis.sh, jatevo.ai or oyenza.com.

6.5 When to use sponsored, nofollow or ugc

Google says: "Mark links that are advertisements or paid placements (commonly called paid links) with the sponsored value." (https://developers.google.com/search/docs/crawling-indexing/qualify-outbound-links, last updated 2025-12-10 UTC) [E17] [E20].

Link type	rel value
Paid listings, partner deals, affiliate links	"sponsored"
Links in user content (comments, user-submitted startup data)	"ugc"
Template links on 1001startup.id to your own companies ("Who is building this" block)	"nofollow"
One "built by" link on /tentang to the brand you choose	none (followed). This is the one exception. /tentang is the about page that shows who builds the census. It is one editorial link on one page, not a template link.
"Dibuat oleh" brand line on oyenza.com that links to /tentang	"nofollow", because it is a brand mention, not a vote
Source links in company profiles and /news briefs	none (leave them followed, because they are editorial citations)

The Myth check box in section 3.4 shows that nofollow does not save crawl budget on this site.

6.6 Digital PR with census data

Story ideas. Each idea uses census data on the site on 5 Oct 2026:

1. "364 of 387 census startups have their head office in Greater Jakarta" (https://1001startup.id/id/) [E13]. The census has rows only for Greater Jakarta, Bandung and Bali. State this limit in the pitch. Do not present the 364 as a national finding.
2. "East Ventures backs 49 census companies, and 359 of 507 investors back only one": the investor concentration story (https://1001startup.id/investors) [E14].
3. "10 census startups are valued at US$1 billion or more, and only 7 of the values come from private rounds" (https://1001startup.id/id/unicorn) [E13]. State the caveat from the page in the pitch. Only 24 of 387 census rows carry a sourced valuation, and the page says "ini bukan daftar lengkap unicorn Indonesia" [E13].
4. "3 closed startups raised US$428 million" (https://1001startup.id/id/closed) [E13].

Tactics:

1. Give each chart an embed code. Include a visible credit line and a link to the source page, such as "Sumber: sensus 1001startup.id".
2. Use only a branded, visible credit link in the embed code. Do not use keyword anchors.
3. Publish a quarterly report, "Laporan Sensus Startup Indonesia Q4 2026", at a fixed URL.
4. Send the report to the outlets below. Pitch only with your approval.
5. Target a data citation on databoks.katadata.co.id. It ranks #9 for "unicorn indonesia" (ID, third-party keyword tool, 5 Oct 2026) [E8].

Google's link spam list includes "Keyword-rich, hidden, or low-quality links embedded in widgets that are distributed across various sites" (https://developers.google.com/search/docs/essentials/spam-policies, last updated 2026-08-28 UTC, fetched 5 Oct 2026) [E17]. Tactic 2 follows this rule.

Outlets to start with (homepage HTTP 200 on 5 Oct 2026) [E18]: dailysocial.id, id.techinasia.com, katadata.co.id, databoks.katadata.co.id, dealstreetasia.com and e27.co.

- I did not verify journalist names **[DATA FROM LUCA: PR contacts]**.

6.7 Keep the census topic clean

- Use /research only for census research: startups, funding, investors, sectors and closures.
- Do not publish Oyenza or other product promotion on 1001startup.id.
- Google says: "The site reputation policy applies where third-party content is published on a host site mainly because of that host's already-established ranking signals" (https://developers.google.com/search/docs/essentials/spam-policies, fetched 5 Oct 2026) [E17] [E20].
- Your X post says that you use the research blog mainly to push your new product site [E19].
- The domain in that post does not resolve (NXDOMAIN, 5 Oct 2026) [E16]. It is oyenza.com.

7. 30/60/90-day action plan

The source strategy gives priorities and an order of work. It gives no dates. The split into 30, 60 and 90 days below is my proposal. Day 1 starts when you approve the plan.

30/60/90-day plan at a glance

Days 1 to 30

- Search Console access; connect Analytics to RankMySEO
- Titles, H1s and intros on /id/ URLs (home, /id/unicorn, /id/closed first)
- Make /tentang (and /about) with the brand line
- /id/sector hub; hub links from home and nav
- rel "nofollow" on template links to jatevo.ai and vantis.sh
- Quality gates; /id/city/bali to noindex
- Trailing-slash rule; logo alt text

Days 31 to 60

- Sitemap index, one child sitemap per page type
- Company template upgrade
- Investor, sector and city template upgrade
- Restructure /id/, /id/unicorn and /id/closed
- Research pages for P2 and P3
- Research pages for P4
- 4 to 6 contextual links from vantis.sh, jatevo.ai and oyenza.com
- Dataset schema properties on home

Days 61 to 90

- Research pages: jumlah startup, startup IPO
- Closed-company entries (for example eFishery)
- Embeddable charts; “Laporan Sensus Startup Indonesia Q4 2026”
- Pitch the report to the outlets
- Full RankMySEO site audit; Page Indexing check
- Review ranks and AI-answer tracking

Figure 3. Short labels for the actions in the table below. The table gives the full actions and what each one depends on.

Phase	Action	Depends on
Days 1 to 30	Give Search Console access and connect Analytics to the RankMySEO project.	[DATA FROM LUCA]
Days 1 to 30	Change titles, H1s and intros on `/id/` URLs to the priority keywords. Start with home, /id/unicorn and /id/closed.	None
Days 1 to 30	Make /tentang (and /about) with the brand line.	Brand choice [DATA FROM LUCA]
Days 1 to 30	Add the /id/sector hub. Link the sector, city, investor and unicorn hubs from home and nav.	None
Days 1 to 30	Set rel "nofollow" on the template links to jatevo.ai and vantis.sh. Keep one followed "built by" link on /tentang.	/tentang live
Days 1 to 30	Apply the quality gates: noindex and sitemap removal for pages below the gate. Set /id/city/bali to noindex (6 census companies, below the 10 gate).	Gate count [DATA FROM LUCA]
Days 1 to 30	Fix the trailing-slash rule and add logo alt text.	None
Days 31 to 60	Split the sitemap into a sitemap index with one child sitemap per page type.	None
Days 31 to 60	Upgrade the company template: "Pendiri" row, schema fields, city and research links.	Founder data [DATA FROM LUCA]

Phase	Action	Depends on
Days 31 to 60	Upgrade the investor, sector and city templates: answer block, H2s, schema.	None
Days 31 to 60	Restructure /id/, /id/unicorn and /id/closed with the P1, P3 and P5 H2 outlines in section 5.	None
Days 31 to 60	Publish the new research pages for P2 and P3: modal ventura, unicorn adalah and decacorn adalah.	None
Days 31 to 60	Publish the new research pages for P4: pendanaan startup and tahapan pendanaan startup.	Funding data [DATA FROM LUCA]
Days 31 to 60	Add the 4 to 6 contextual links from vantis.sh, jatevo.ai and oyenza.com.	/tentang live
Days 31 to 60	Add the Dataset schema properties on home.	CSV decision [DATA FROM LUCA]
Days 61 to 90	Publish "jumlah startup di indonesia" and "startup indonesia yang sudah ipo" research pages.	None
Days 61 to 90	Decide and build the closed-company entries (for example eFishery).	[DATA FROM LUCA]
Days 61 to 90	Make embeddable charts. Publish "Laporan Sensus Startup Indonesia Q4 2026".	None
Days 61 to 90	Pitch the report to the outlets.	Your approval, PR contacts [DATA FROM LUCA]
Days 61 to 90	Run a full RankMySEO site audit. Check the gates in the Search Console Page Indexing report.	Search Console connected
Days 61 to 90	Review ranks and AI-answer tracking in RankMySEO.	My confirmation of the tracked keywords and the 10 AI prompts

Next steps

RankMySEO setup

I recommend RankMySEO (https://rankmyseo.com) as the SEO tool for 1001startup.id. The reasons:

- The project "1001 startup Luca" exists, with country Indonesia and language Indonesian [E2].
- It gave the Indonesian volumes and difficulty for the main keywords in this report [E5].
- It tracks ranks in Indonesia and runs site audits [E3] [E4] [E6].
- The plan includes AI-answer tracking for ChatGPT and Gemini, with 10 prompts per site [E1]. This fits a site where AI engines are the main readers (section 2.7).

Setup steps to do after approval. None of these steps is done yet.

1. Give Search Console access (steps below) and connect Analytics to the project **[DATA FROM LUCA]**.
2. Add the priority keywords from Appendix A to rank tracking.
3. Add 4 competitors: startupindonesia.id, startupindonesia.co, id.techinasia.com and seedtable.com [E20].
4. Run the keyword gap and competitor traffic reports after step 3.
5. Add the 10 AI prompts from section 2.7.
6. Run a full site audit after the template fixes in section 3.

How to give Search Console and Analytics access

You must be an owner of the 1001startup.id property to add a user [E22].

1. Add the Google Account email I send you as a Restricted user in Search Console (Settings > Users and permissions).
2. Add the same email with the Viewer role in Google Analytics (Admin > Property access management).

Restricted gives read-only access to Search Console data. Viewer gives read-only access in Analytics.

Questions for you

1. Which brand line do you want on /tentang: Jatevo Labs, Vantis, or both?
2. Can you give founder data with sources for the "Pendiri" field?
3. How many of the 387 company rows fail the 4-of-7 field gate (section 3.4)?
4. Can you give funding by sector, by year and by round for P4?
5. Will the census offer a CSV or API download (Dataset distribution)?
6. Can you give Search Console access (steps above) and connect Analytics to the RankMySEO project?
7. Do you have PR contacts at the outlets in section 6.6?
8. Do you plan to add rows for Yogyakarta, Surabaya or Malang?
9. Do you want profile pages for closed companies such as eFishery (P5)?
10. What does /company/gojek/ return now? My two checks gave different results (404 and 301). Please confirm the current behaviour.
11. Does the census have an investor country field? P2 needs it for the H2 "Investor asing dan lokal".
12. Can you give startup counts per Jakarta district? P6 needs them for the H2 "Startup Jakarta per wilayah".

Decisions I will confirm before I start

- I will confirm the 10 AI prompts in section 2.7 before I add them to RankMySEO.
- I will confirm the list of priority keywords for rank tracking before I start.
- I will confirm the 4 competitors before I add them to the project.

Data gaps

1. RankMySEO returned no volume for "daftar startup indonesia". The 20 searches come from the third-party keyword tool.
2. RankMySEO gave no Indonesian SERP list, because the project has 0 competitors. The ID SERP lists come from the third-party keyword tool.
3. Google Trends values are relative (0 to 100). They are not search volumes.
4. I did not run the RankMySEO site research, keyword gap or competitor traffic reports. Section 2.1 gives the reasons.

Appendix

This appendix holds the detail tables. The main sections point to them.

Appendix A. Priority keyword list (44 keywords)

Rule: Indonesian keywords target the `/id/` URL. The English URL stays as the hreflang alternate.

KD values come from the RankMySEO keyword planner [E5]. SD values come from the third-party keyword tool [E7]. Volume is monthly searches in Indonesia, pulled on 5 Oct 2026.

A. Head and category (8)

#	Keyword	Volume	KD / SD	Target URL
1	startup indonesia	590	KD 38	/id/
2	perusahaan startup indonesia	140	KD 13	/id/ (secondary)
3	startup di indonesia	210	SD 23	/id/ (secondary)
4	daftar startup indonesia	20	SD 13	/id/ (secondary)
5	unicorn indonesia	320	KD 33	/id/unicorn
6	startup unicorn indonesia	140	KD 19	/id/unicorn (secondary)
7	decacorn indonesia	50	SD 18	/id/unicorn (secondary)
8	startup terbesar di indonesia	30	SD 5	/id/ (secondary)

For "daftar startup indonesia", RankMySEO returned no volume. The value 20 comes from the third-party keyword tool [E7].

B. Programmatic company patterns (12)

#	Pattern or example	Volume	KD / SD	Target URL
9	[company] valuasi: valuasi gojek	50	SD 18	/id/company/gojek
10	valuasi traveloka	20	SD 18	/id/company/traveloka
11	valuasi ruangguru	10	SD 18	/id/company/ruangguru
12	[company] pendanaan (pattern)	no row returned	n/a	/id/company/[slug]
13	[company] founder: pendiri gojek	3,600	SD 25	/id/company/gojek (needs founder field)
14	pendiri traveloka	260	SD 34	/id/company/traveloka (needs founder field)
15	startup [sector] indonesia: startup fintech indonesia	30	SD 14	/id/sector/fintech

#	Pattern or example	Volume	KD / SD	Target URL
16	startup edtech indonesia	10	SD 13	/id/sector/edtech
17	startup agritech indonesia	10	SD 13	/id/sector/agri
18	startup [kota]: startup bandung	140	SD 20	/id/city/bandung
19	startup jakarta	50	SD 20	/id/city/jakarta
20	startup bali	30	SD 20	/id/map, H2 "Startup Bandung dan Bali" (set /id/city/bali to noindex: 6 census companies, below the 10 gate)

C. Investor patterns (8)

#	Keyword	Volume	KD / SD	Target URL
21	venture capital indonesia	4,400	KD 32	/id/investors
22	investor startup indonesia	0 (autocomplete #1)	KD 12	/id/investors (secondary)
23	perusahaan modal ventura di indonesia	50	SD 6	/id/investors (secondary)
24	list venture capital indonesia	10	SD 5	/id/investors (secondary)
25	[investor] portfolio: gdp venture	880	SD 40	/id/investor/gdp-venture
26	east ventures (autocomplete "portofolio east ventures")	1,900	SD 47	/id/investor/east-ventures
27	alpha jwc ventures	880	SD 32	/id/investor/alpha-jwc-ventures
28	softbank vision fund	70	SD 14	/id/investor/softbank-vision-fund

D. Research and data (9)

#	Keyword	Volume	KD / SD	Target URL
29	pendanaan startup	70	KD 19	/id/research/pendanaan-startup-indonesia (new)
30	pendanaan startup 2025 (the 2026 variant comes from autocomplete only [E10])	20	KD 14	same URL (secondary)
31	jumlah startup di indonesia	20	SD 5	/id/research/jumlah-startup-indonesia (new)
32	data startup indonesia	10	SD 13	/id/coverage
33	startup indonesia yang bangkrut	20	SD 5	/id/closed

Appendix B. Fixes per template

Note: many current titles use a dash between the page name and the brand. I describe these titles in words in the tables below.

Company template (seen on /id/company/astro, /company/traveloka, /company/ruangguru and /company/qalboo, 5 Oct 2026) [E13]

Item	Issue	Fix	Priority
Title tag	The pattern is the company name, "pendanaan, valuasi, jumlah karyawan" and the brand suffix. Some titles drop the brand suffix (for example /id/company/traveloka).	ID pattern: "[Company]: valuasi, pendanaan, pendiri | 1001startup.id". Drop the suffix only above 60 characters.	High
Meta description	Good pattern: "Astro: Commerce · Jakarta Barat · menghimpun dana US$142 juta · 994 pekerja. Sumber publik, estimasi diberi label." Empty profiles (for example Qalboo) get only the sector and the city.	Keep. Add the last round and the update date: "[Company] ([sector], [city]): pendanaan US$[x], putaran terakhir [round] ([year]), [n] pekerja. Data per [date]."	Medium
H1	"Astro"	On /id/: "[Company]: profil, pendanaan dan valuasi". Keep the name first.	Medium

Item	Issue	Fix	Priority
Schema	Organization, WebPage (dateModified 2026-09-30, isPartOf Dataset) and BreadcrumbList. The BreadcrumbList says "e-commerce & commerce". The visible trail says "Commerce".	Add to Organization: "@id" (page URL + "#org"), foundingDate, founder (Person), funder (investors), sameAs (company site, LinkedIn) and description. Make BreadcrumbList names match the visible trail.	Medium
Content	No founder field on the company pages checked. "Pendiri" is not on /id/company/traveloka.	Add a "Pendiri" row with a source **[DATA FROM LUCA]**. This field serves "pendiri gojek" (3,600) and "pendiri traveloka" (260) [E7].	High
Internal links	Breadcrumb, a "Sebanding di Commerce" sibling block and investor links.	Add a city link (/id/city/[city]) and a link to the matching research pillar. Keep 5 to 8 sibling links.	Medium
Canonical, index, sitemap	Self canonical, "index, follow", in sitemap.	Keep. Apply the quality gate in section 3.4.	High

Investor template (seen on /investor/gdp-venture, /id/investor/gdp-venture, /investor/east-ventures and /investor/undisclosed-angel-investor, 5 Oct 2026) [E13]

Item	Issue	Fix	Priority
Title tag	The ID title "Portofolio GDP Venture" plus the brand is good. The EN title is the investor name, "Investors" and the brand.	Pattern: "Portofolio [Investor]: [n] startup di Indonesia | 1001startup.id".	Medium
Meta description	"Portofolio GDP Venture di sensus startup Indonesia: 25 perusahaan didanai, lengkap dengan pendanaan, lapangan kerja, dan sumbernya."	Keep. Add top sectors and the update date.	Low
H1	"GDP Venture"	"Portofolio [Investor] di Indonesia".	Medium
Schema	BreadcrumbList only.	Add Organization for the investor (name, url, sameAs). Add an ItemList of portfolio companies with links to /id/company/[slug].	Medium
Content	No H2. /investor/east-ventures has 722 words.	Add an answer sentence: "Menurut sensus 1001startup.id (diperbarui [date]), [Investor] mendanai [n] startup ...". Then add H2s: portfolio by sector, rounds and co-investors.	Medium
Internal links	Links to portfolio companies only.	Add links to /id/investors, to 3 co-investor pages and to sector hubs.	Medium
Thin risk	359 of 507 investor pages show 1 census company [E14]. "undisclosed angel investor" is an indexable page ("index, follow").	Apply the quality gate in section 3.4.	High

Sector and city template (seen on /id/sector/fintech, /sector/fintech and /id/city/jakarta, 5 Oct 2026) [E13]

Item	Issue	Fix	Priority
Title tag	"Startup fintech di Indonesia" plus the brand. No count and no year.	Add the count and the year: "Startup fintech di Indonesia: daftar 64 perusahaan (2026)".	Medium
Schema	ItemList (numberOfItems 64) and BreadcrumbList.	Keep. Add CollectionPage with dateModified.	Medium
Content	No H2. /id/sector/fintech has 901 words.	Add an answer block (count, total funding, top 3 by funding, date). Add H2s: biggest by funding, investors in this sector, closed companies in this sector.	Medium
Internal links	Sector pages link to each other [E20].	Link them from home and nav (section 3.2, item 3). Link to the city pages.	High

Research post template (seen on /research/indonesia-computer-import-growth and its /id/ copy, 5 Oct 2026) [E13]

Item	Issue	Fix	Priority
Title tag	"Searching for H200 and B300 AI clusters in Indonesia's imports · 1001startup.id" has 79 characters.	Keep it under 60 characters. Put the keyword first.	Medium
Meta description	179 characters.	Cut it to about 155 characters.	Low
Schema	BlogPosting (datePublished 2026-09-23, author Organization).	Use Article or BlogPosting with author Person (Luca Cada Lora, url to /tentang). Add dateModified, image, and "about" that points to the Dataset.	Medium
Content	2,808 words. No visible byline. The topic is AI hardware imports.	Add a byline and an update date. Keep research on the census topics in section 4. This post is outside the census topics, so I do not use it in the link plan or PR. Do not use /research to promote other products (section 6.7).	Medium
Internal links	Breadcrumb and the "Who is building this" block only.	Link to 3 or more census pages (companies, sectors) that the post names.	Medium

Home template (seen on / and /id/, 5 Oct 2026) [E13]

Item	Issue	Fix	Priority
Title tag	ID title is "Sensus Startup Indonesia" plus the brand.	"Startup Indonesia: daftar 387 perusahaan | Sensus 1001startup.id". Update the number at each rebuild.	High
Meta description	"Sensus startup Indonesia: daftar 387 perusahaan dengan data pendanaan, valuasi, jumlah pekerja, dan peta kantornya. Sumber publik saja, estimasi diberi label."	Keep.	Low

Item	Issue	Fix	Priority
H1	ID "Sensus startup Indonesia."; EN "Indonesia's startup graph."	ID: "Sensus startup Indonesia: daftar perusahaan startup 2026".	High
Schema	Organization, WebSite and Dataset. The Dataset has no license and no dateModified.	Dataset: add license, dateModified, temporalCoverage and variableMeasured (funding, valuation, headcount, output). Add distribution if you offer a download **[DATA FROM LUCA]**. Add creator with Person. Organization: add founder (Person), the brand tie to Jatevo Labs or Vantis **[DATA FROM LUCA]** and sameAs.	Medium
Content	The answer sentence is present: "Menurut 1001startup.id (diperbarui 1 Okt 2026), sensus ini mencatat 387 startup Indonesia ...". The page is about 1.0 MB, with 523 internal and 213 external links.	Keep the answer sentence. Load the full table in pages or by sector to cut page weight.	Medium

Other pages [E13]

Page	Issue	Fix	Priority
/id/unicorn	The title and H1 do not contain "unicorn". The body uses it 5 times.	New title: "Startup unicorn Indonesia: daftar 10 perusahaan bernilai US$1 miliar+ (2026)". Keep the private, market cap and estimate split.	High
/id/closed	The H1 "Yang berhenti." has no keyword. The page shows 3 closed companies and 4 removed rows.	New H1: "Startup Indonesia yang bangkrut dan tutup". Add ItemList schema. List the 4 removed rows with reasons, or explain why they are not listed.	Medium
/map	No JSON-LD and 277 words.	Add BreadcrumbList. Add a text list of cities with counts and links.	Low
/news	462 briefs on one URL. No brief has its own URL [E20].	Keep it as one hub. Give a brief its own URL only if it has original data and 150+ words. Other new URLs are thin.	Low
